

Welcome to One AI Academy!

One AI Platform

Hayley Bresina
One AI Client Enablement

Audience

- One AI Academy is tailor-made for One Model core users
 - People & Talent Acquisition Analysts
 - Human Resources, People, & Talent Acquisition Leaders
 - Data Scientists
 - **YOU!**
- All experience levels are welcome and encouraged

Purpose

- Meet learners at their level
- Provide foundational & functional knowledge
 - The **how** & **why** behind the One AI toolkit
- Empower you to use the One AI toolkit in a variety of applications to provide valuable insights

ML Models

Forecasting

Generative
AI

What to Expect

- Content spanning machine learning, modeling, embedded insights, & generative AI
- Learning at your own pace
- Open office hours with the One AI team
- Exclusive webinar series with industry experts
- Building community with fellow One AI users
- Updates to content to keep you up to date with this fast-paced field & the many new features to be released in One Model

3 Pillars of One AI Academy

Education

- Combination of written and video content about ML/AI foundations, when One AI tools should be used, client use cases/best practices, & how-tos
- Foundational and functional paths to meet learners where they are
- Sandbox environment to experiment with relevant data and view template content

Engagement

- Monthly or quarterly live Lunch & Learn-style webinars with relevant topics, different speakers, and Q&As
- Recordings will be added to One AI Academy
- Monthly external office hours where customers can meet with the One AI Team and ask questions about anything One AI

Community

- Customers get the ability to speak with other One AI users
- Learn from each other and explore best practices and scenarios where particular tools or models were helpful
- Opportunities to showcase work with use cases & blogs

Where Do I Begin?

- **Log in** to the One Model Help Center & Navigate to the **One AI Academy** category
- Choose your track
 - **Available tracks:** Beginner, One AI functional knowledge, I want to learn everything!, etc.
 - Tracks are located in the Welcome to One AI Academy Subsection along with this module
 - Modules should be watched in order as they build upon what was learned in previous ones
- Follow along in One Model & enjoy!

One AI Functional Knowledge Track 🔒

Machine Learning Foundations Track 🔒

I Want to Learn Everything! Track 🔒

Additional Information

- Modules include a description of the topic, the module type, level, & audience, linked prerequisite modules, the run time, & the video transcript

Description: Join Josh to learn about what to do once you have a model that your are happy with and want to share results with stakeholders in Storyboards in One Model. Learn about all of the actions you can take with models and their results to include deploy, deploy and persist, and ignore.

Module Type: Foundational  & Functional 

Level: Beginner 

Audience: All

Prerequisites: "[One AI Recipes](#)", "[One AI Exploratory Data Analysis \(EDA\) Report](#)", & "[One AI Results Summary](#)" modules. The "[Classification Model Evaluation](#)" module is recommended, but not required.

Run time: ~11 minutes

Thanks for watching!
