"Welcome to One AI Academy" Module Transcript

Chapter 1

Introduction to One AI Academy

Welcome data lovers, analysts, and AI enthusiasts, to One AI Academy. Whether you're just starting your journey into artificial knowledge and tools here to give you the knowledge and tools to understand and use machine learning and artificial intelligence, helping you unlock the full potential of the One AI toolkit in One Model.

Chapter 2

Audience

One AI Academy is tailored for One Model's core users. It caters to people, analysts seeking deeper insights, human resources, people, and talent acquisition managers and leaders aiming to unlock hidden potential and data scientists navigating the ever-evolving AI landscape.

All experience levels are warmly welcomed and encouraged.

Whether you're a complete beginner or already have some experience under your belt. Our goal is simple, to equip you with the why and how behind machine learning and broader artificial intelligence concepts so you can confidently use the One AI toolkit like a pro and provide valuable insights to your organization.

You will gain both foundational knowledge about artificial intelligence and machine learning more broadly, as well as functional knowledge on how to use One AI to accomplish your goals. We will cover machine learning modeling, forecasting, generative AI, and much more.

Chapter 3

One AI Academy Expectations

So, what can you expect from your journey with us? One AI Academy offers a rich blend of content designed to cater to diverse learning styles. Learn at your own pace when you have time. These learning modules will be paired with open office hours where the experts from

the One AI team will be standing by to answer questions, talk use cases, and provide guidance.

But that's not all. One AI Academy attendees will also be invited to attend our exclusive webinar series, where we dive deep into current events and hot topics in the AI and machine learning space as relevant to One AI. You will have the opportunity to learn from industry experts and gain insights that will give you a competitive edge. And let's not forget the heart and soul of the academy, community. Because learning is so much more fun when you're doing it alongside likeminded individuals.

Connect, collaborate, and share your experiences with fellow One AI learners. We will continue to expand with more modules guided by your requests and questions and as new exciting features are released in One Model.

One AI Academy stands on three pillars, education, engagement, and community.

Chapter 4

Accessing One AI Academy

If any of this interests you, get started by logging into the One Model help center and navigating to the One AI Academy category. You must be logged in to view this content.

Chapter 5

Learning Tracks & Modules

Then, choose your track. Everyone's learning journey is unique, so we offer multiple learning paths to match your experience and starting point. We have a beginner track for those new to One AI and machine learning, a functional knowledge track for those with a background in machine learning who want to apply this knowledge with One AI tools, a machine learning track for foundational learning, and many more! Explore each track to find the one that best fits your needs.

Within these tracks, we have linked the recommended modules. These modules should be watched in order as each one builds upon previous modules.

Some modules are marked as optional. While they are not required to understand the core concepts, they add extra depth. The optional modules are included to suggest the most logical sequence for viewing.

As you work through the modules, feel free to follow along in One Model. You can ask questions by commenting within the articles in the help center or bring them to office hours.

Each module includes a description of the topic, the module type, which could be foundational or functional or both, the module level, which could be beginner, intermediate, or advanced, the audience, which lets you know who this module was designed for, the linked prerequisite modules so you can make sure you have all the context you need to understand what we will cover, the runtime, and the video transcript in case you prefer written content over video. Modules are also closed-captioned.

Chapter 6

Conclusion & Thanks

We are so excited to play a part in your artificial intelligence learning journey. Enjoy the academy!
